How To Successfully Migrate Your Data From HMIS (Batesville) to Gather

Specify and Assess Your Migration Needs When switching to Gather, assess what historical data you need to be migrated to the new system using Page 2 in this guide. Please note: because you're moving to an entirely new system, your migrated data will be displayed differently in Gather, and will take some time to get used to.
Establish a Cut-Off Date From Your Old System Work with your new account manager at Gather to establish a cut-off date where your team will stop entering cases in HMIS, and begin entering new cases in Gather. We do not migrate multiple times, so plan accordingly with this date, and be sure to get your trainings completed in a timely manner.
Request a Data Backup From HMIS (Batesville) Communicate with your HMIS (Batesville) account manager and request a complete SQL backup file of your data. Once you receive the export, forward the data backup to your new account manager at Gather. This step is crucial, and requires your participation to obtain the required data from HMIS.
Be Patient, Data Migration Takes Time + Effort Data migration requires your collaboration. If you commit to completing this project, data migration can be completed within 2-4 business weeks. The timeline is based upon several factors, including receiving your data backup, the size of your migration; and can not be finished until you stop using your old system.
Review + Validate Your Migrated Data Our team will conduct a mini migration of approximately 15 cases. We need you to review the mini migration and validate the data being migrated from HMIS to Gather. Once our data team has your approval, we'll complete the rest of the migration and ask you to review one last time. And just like that, you're ready to go!

What Data Should You Migrate From HMIS (Batesville) to Gather?

Yes, We Can Do That

Yes, But Please Note

Case Data + Vitals

Includes case info for migrated cases (death certificate info, case number, case type, creation date, death date, case name, SSN, gender).

All custom notes for a specific case are migrated as one consolidated custom note that is attached to the respective case in Gather.

Includes and syncs contact info for all related acquaintances or helpers for a particular case (helper name, helper email, helper phone, relationship to decedent, and full address).

Includes contracts and logged payments for each case. A digital PDF of the case's existing contract or statement is attached to the case's files in Gather.

Unable to Migrate

Includes any existing cases that still owe on their statement or contract. We recommend that you collect, close out, or manually move your current Accounts Receivable.
